Online Master of Science in Business Analytics

Nearly 2.5 quintillion bytes of data are produced every day.¹ What will you do with it?

Data science and analytics (DSA) is an evolving and expanding field that has seen a nearly 46% growth in hiring since 2019. This increase has heightened the demand for diverse skill sets across a variety of industries, including in roles such as:²

· Data scientist

- · Chief analytics officer
- · Data management analyst
- · IT project manager
- · Financial analyst
- · Marketing manager
- · Business intelligence analyst

Build Success With High-Demand Data Skills

While data science and analytics job titles vary widely, most pull from a single suite of related skills and competencies. Your specific skill mix can indicate where you might find success, whether in advanced data analytics, analytic management, functional analytics or data-driven decision-making.

Regardless of the job title you desire, consider what skills you may need to grow and sharpen to advance your data and analytics career.

Which Skills Are in High Demand?

Data science jobs are expected to grow much faster than average through 2033,³ with a high value placed on proficiency in:

- Programming languages, with Python, SQL, and R topping the list⁴
- Machine learning
- Probability and statistics
- Data management
- Econometrics
- Statistical visualization⁵

Refine your own <u>data and analytics skills</u> with the <u>Online Master of Science in Business Analytics</u> (<u>MSBA</u>) from William & Mary.

Built for Your Competitive Advantage

The Online MSBA has been crafted with an uncommon degree of care around the central program theme of business intelligence and analytics. This theme represents a two-pronged approach to a professional education in analytics, one that encompasses both the technical mastery of contemporary programming languages and digital tools and the business communication and strategy acumen required to lead in a data-driven role.

Technological Solutions to Complex Problems:

Throughout the Online MSBA program, you will receive hands-on experience working with powerful computing technologies used to tackle contemporary businesses most difficult analytical problems. Programming languages taught throughout the Online MSBA program include R, Python and SQL, and coursework covers best practices for database management, machine learning utilizing the Hadoop environment and Amazon Web Services, and more.

The Art of Persuasion, Backed by Data:

The Online MSBA has been built with the knowledge that even the most compelling conclusions reached through data analysis will fall flat if communicated poorly. Beginning with the introductory course "Competing Through Business Analytics," the Online MSBA teaches students to use an array of data visualization tools and verbal and written communication strategies to make an impact on decision makers and stakeholders in any business setting.

The result? A robust, multifaceted skill set that can make you the data science and analytics professional that modern business demands.

View Our Curriculum

The 4 Pillars of Our Curriculum

Our rigorous <u>32-credit curriculum</u> is designed to give students a competitive advantage in high-growth, high-impact roles across multiple contemporary fields. To help set you up for sustained success as a data science professional, the Online MSBA curriculum centers around <u>four core pillars:</u>

Business Acumen:

Aspects of business analytics relating to marketing, finance, economics, operations, supply chain and human resources management, and more

Computing Technologies:

Data management, data analytics tools (Excel, data mining, business intelligence, etc.), programming and more

View Our Courses

Math Modeling:

Aspects of data analysis, including probability distributions, descriptive and inferential statistics, optimization, and experimental design

Communicating With Impact:

Communicate data insights clearly, coherently and compellingly to audiences less familiar with such technical materials

What Our Students Say

"The Online MSBA program pushed me to technical and academic achievements far beyond those I would have ever thought myself capable of reaching. Getting exposure to using artificial neural networks for image classification was huge. Moreover, computer vision is a perfect example of a skill that most MSBA programs don't cover, and a way in which William & Mary stands out at the absolute top of the pack."

—TED HALLUM, MSBA '20

Senior Defense Machine Learning Engineer, Octo Consulting Group Founder, Veterans in Data Science & Machine Learning

It's Time to Reimagine Business Education

An MSBA Accessible Anytime, Anywhere

Within the Canvas Student mobile app, you can:

- · View grades and course content
- · Submit assignments
- · Keep track of coursework with a to-do list and calendar
- · Send and receive messages
- · Post to discussions
- · Watch videos
- · Take quizzes
- · Receive push notifications for new grades and course updates and much more!

Discover the W&M Online Experience

In Competing Through Business Analytics, we developed essential skills—the ability to visualize data and to use it to persuade clients—that would serve us in class, our eventual jobs and, more pertinently, our job interviews.

Admissions Requirements

To qualify for admission to the Online MSBA program, applicants must have:

- ☐ A bachelor's degree from a regionally accredited university
- ☐ Two years of professional work experience or **proof of business acumen**

Qualified applicants must complete and submit the following:

- □ Online application, including:
 - Official academic transcripts from all institutions where you have received a conferred bachelor or graduate degree. These must be sent directly from your institution
 - Two letters of reference: Please select individuals who can provide specific and relevant information about your intellectual and quantitative abilities, performance and motivation; do not include an immediate family member
 - One 300-word personal statement
- ☐ Application fee of \$100 (nonrefundable; a fee waiver may be available)
- \square A bachelor's degree from a regionally accredited university with a GPA of 3.0 or higher (on a 4.0 scale)
- ☐ Proof of English language proficiency (for non-U.S. citizens)
- Personal admission interview: Qualified applicants who have submitted and completed their application will be invited to schedule a personal admission interview. Interviews can be conducted on campus, via video conference or by telephone
